

1. Initial Setup

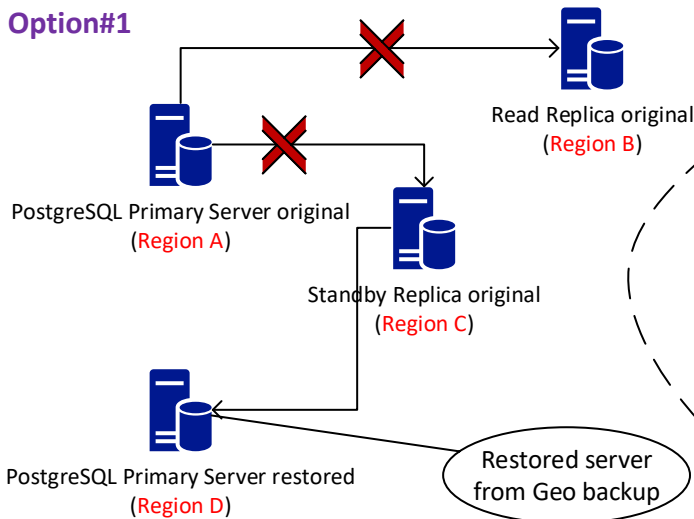

2. Region A goes down

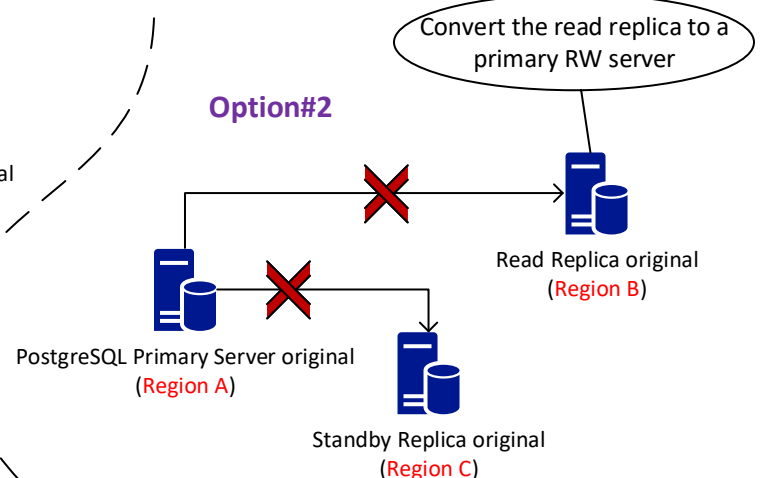

3. Server Restoration (2 options)

Option#1

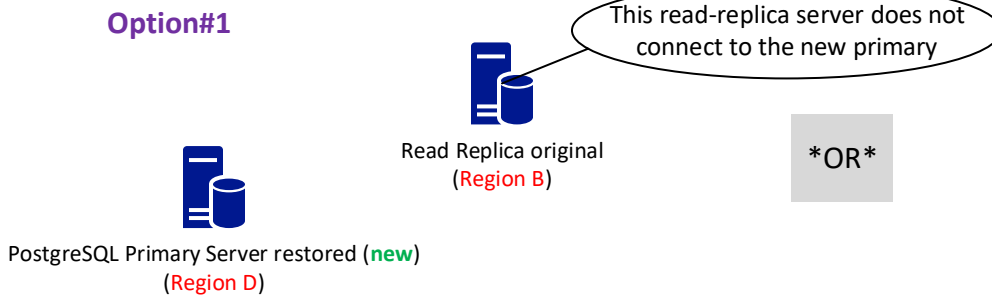

Option#2

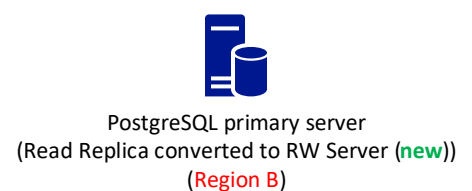

4. How does the final setup look like?

Option#1

OR

Option#2

At this point both the primary servers Option #1 or Option #2 are independent servers and read replicas can be added. The old server and read replicas will need to be decommissioned once the restoration is completed and the Region A comes back online.
